

Technical data / data sheet

VTT Visco

HIGHLIGHTS

- Wet strength
- Highly absorbent

Material

Weight	100 % natural viscose fibres (rayon),
	approx. 75g/m ²

Features

	very robust, highly absorbent
	above-average suction speed
	reusable, binder and chemical free
	high resistance strength, wet strength

Application area

	Suitable for sensitive areas, e.g. in paint shops and print shops, automotive industry, plastics and furniture industry, precision mechanics, building cleaning, commercial kitchens
--	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Waste disposal

	The material in its origin behaves neutrally on landfills and is fully rottable within a short time. It burns without residue or pollutants and is characterised by a high calorific value.
--	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Delivery form

	Cartons à 400 wipes, rolls of 400 tear-offs
--	---------------------------------------------

Colour

	white
