

Lifting belts **profix inox**

Cut protected flat belts - the sling for more longevity

Guaranteed to be reliable and long lasting

By making use of the mamutex lifting belt, you are putting your trust in a high-tech product that has achieved worldwide recognition and which is manufactured in every respect to provide the highest degree of reliability and resistance to wear. That guarantees you load lifting that is absolutely safe, whether in a factory or storeroom, or when loading and unloading - and all that at a first class cost-performance ratio!

High efficiency construction for continuous loading

Very compact design and a new processing technique for their webbings are what give mamutex lifting belts their breaking elongation of less than 12%, whilst still maintaining their high degree of flexibility. The mamutex anticut protection tube assures a very high resistance against cuttings on the belt. So the sling is able to be used to lift goods with sharp edges without damaging the belt itself. This enables a longevity-use.

„Swiss Quality“ for maximum safety

mamutex lifting belts are manufactured and customized from start to finish at VTT. This permits a precise degree of quality control and our lifting belts fulfil all the standards relating to safety (EN 1492-1 and ISO9001). Well thought-out details, such as a removable protection tube makes this product to a very innovative tool for progressive liftings.
